GitHub: github.com/ChangingtheSpectrum

Certified Kubernetes Administrator (CKA) and Systems Specialist with over 7 years of hands-on experience supporting, maintaining, and optimizing cloud infrastructure and Linux servers. Proven expertise in technical troubleshooting, cluster administration, automated TLS/certificate management, and CI/CD pipelines. Skilled at bridging complex infrastructure operations with high-tier customer support to drive reliability, service quality, and operational efficiency.

TECHNICAL CORE COMPETENCIES

- **Container Orchestration:** Kubernetes (CKA), Docker, Podman
- **Systems & OS:** Linux System Administration, Storage, Shell/Bash
- **Monitoring & Observability:** Prometheus, Grafana, System Metrics
- **CI/CD & Security:** Jenkins, cert-manager (TLS/SSL), Automation
- **Networking & Hosting:** DNS, TCP/IP, Web Hosting, Ingress Controllers
- **Database & Scripting:** SQL, Python, Troubleshooting & Diagnostics

PROFESSIONAL EXPERIENCE

Customer Support Engineer / Quality Control Specialist

May 2018 – Present

Akamai / Linode

- Deliver high-tier technical support and escalation resolution for cloud infrastructure, Linux servers, networking configurations, and containerized applications across global data centers.
- Devised and implemented a custom support optimization framework from the ground up, significantly improving team efficiency, workflow throughput, and ticket turnaround times.
- Participated directly in the design and execution of quality control standards to elevate service reliability and team-wide technical performance.
- Act as a subject matter expert across the entire Akamai/Linode platform suite, guiding developers and enterprise clients through complex system, network, and hosting architectures.

IT Technician

January 2018

The Institute for Family Health

- Configured, deployed, and maintained network infrastructure across multiple remote clinic sites.
- Monitored network availability and site connectivity in real-time, escalating and resolving outages to minimize operational disruption.
- Ran comprehensive diagnostics across client devices, hardware systems, and local area networks.
- Managed the online technical support queue, logging, tracking, and prioritizing service tickets.

PRODUCTION INFRASTRUCTURE & PRACTICAL PROJECTS

Self-Managed Kubernetes Cloud Infrastructure & Delivery Pipeline

Architected and maintained a production-grade containerized platform hosting web applications and personal infrastructure:

Cloud Kubernetes: Self-managed cluster for application orchestration

Automated TLS: Ingress certificate renewal with cert-manager

Observability: Prometheus & Grafana stack for monitoring

CI/CD Pipeline: Automated build & deployment via Jenkins

CERTIFICATIONS

Certified Kubernetes Administrator (CKA)

Cloud Native Computing Foundation (CNCF)
